

Hobbyist Software today announced the release of [Butler 5.0](#) . Butler has been a best selling app for both the Treo and Centro and the new version introduces a host of new features.

- New 'flash screen' function for alarms
- New interface for accessing the growing number of features
- Added auto-off options page to let you control how/when your device turns off
- Added Speedy keys options page to let you navigate and even type faster!
- Option to select apps which will disable the keyguard.
- Added sliding keyguard option.
- Keyguard completely rebuilt to offer transparent drawing over the main screen (It looks beautiful!).
- Loads of status icons for the keyguard.
- Added Lefty preference page to set the global 'Lefty' setting and a Lefty slider for the keyguard.
- Support for 4Cast weather in keyguard.

[Butler 5.0](#) is available at both the Everything Treo Software Store and the Everything Centro Software Store. [Register for our forums](#) to receive a coupon code valid for 20% off your software purchases.
